D.O.No. Secy(HFW)/IMP/Coronavirus/2020

Dated : 5th February, 2020

Dear *Amit*,

You may be aware of the Novel Coronavirus reported from China and 24 other countries, 3 travel related case in India. Though much is not known about the disease dynamics, it is evident that there is human to human transmission. As of now, there is no drug or vaccine available to manage this disease. Hence preventive measures become crucial to stop spread of this disease.

Creating awareness among university/college students about preventive interventions such as frequent hand wash, respiratory etiquettes (using handkerchief over mouth while coughing/ sneezing, use of tissue paper or using the sleeve of shirt covering upper arm, staying away from college when sick, avoiding public gatherings etc) will help in preventing/ reducing transmission of not only this disease, but also large number of other communicable diseases, notably flu like illnesses. Further, such informed youth can be agents of change for their family, community and beyond.

In view of the above, you are requested to take up with State Education Departments, central universities and other autonomous teaching institutions under your ministry to sensitize their students these simple public health measures that will go a long way in preventing spread of Novel Coronavirus disease. An information pamphlet is enclosed which would come handy for the teachers to sensitize the students.

Yours sincerely
Pd
(Preeti Sudan)

Shri Amit Khare
Secretary
Department of Higher Education
Ministry of Human Resource Development,
Shastri Bhawan, New Delhi

Copy to: Chief Secretaries of all States/UTs for similar action.

Reduce the risk of Coronavirus infection

Follow these important precautions

1
Avoid travel if you are suffering from fever and cough

2
Wash your hands frequently with soap and water

3
Share your travel history with your health worker (ASHA/ ANM)

If you have cough, fever or difficulty in breathing, contact a doctor immediately

Stay protected!

Stay safe from Coronavirus!

If you have returned from Wuhan in China after January 15, then get yourself tested for 2019-nCoV. To know about the centres for testing, call the Ministry of Health and Family Welfare Helpline

If you have returned from China in the last 15 days or have been in contact with any person affected by Coronavirus, then limit your contact with others and use a separate room for sleeping

If you develop fever, cough and difficulty in breathing within 28 days of return from China, immediately call the Ministry of Health and Family Welfare Helpline
